Context

Client: University of Bristol
Theatre Department

Project: Improve current
costume booking system

Current vs Vision

Separate documents → One webapp

Manual spreadsheet → Automated database

Overwhelming
selection → Efficient searching

User stories

Admins

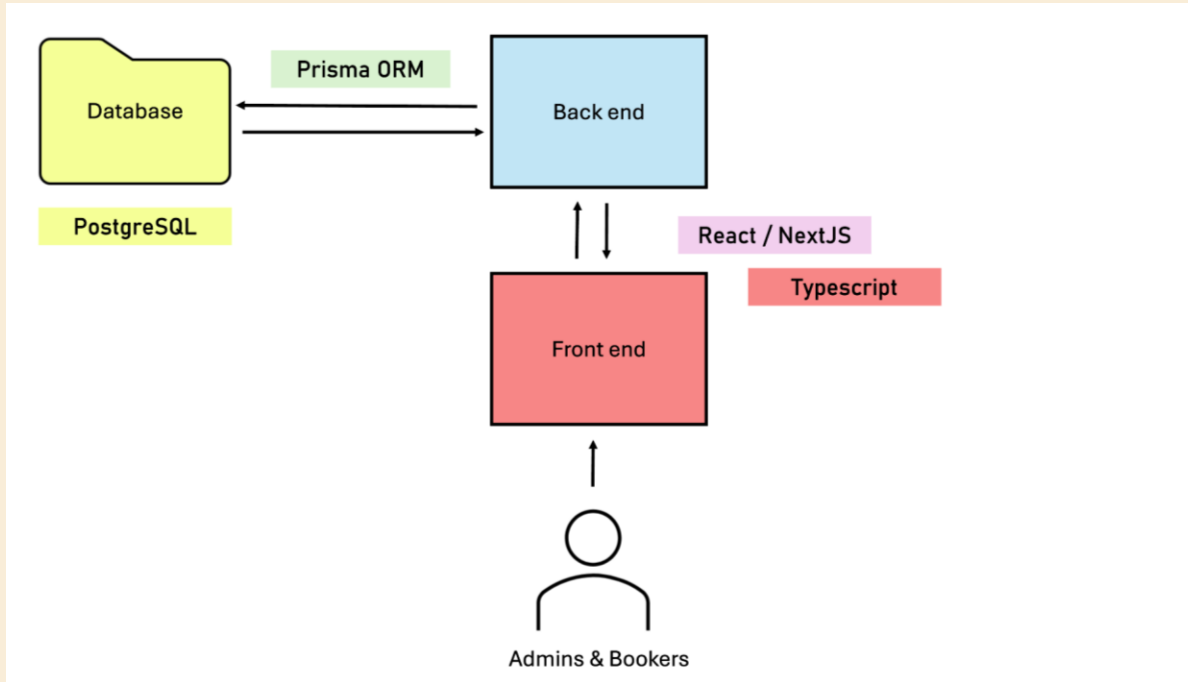

- Updating catalogue
- Automated booking
- Etiquette

Bookers

- Browsing
- Booking

Architecture diagram

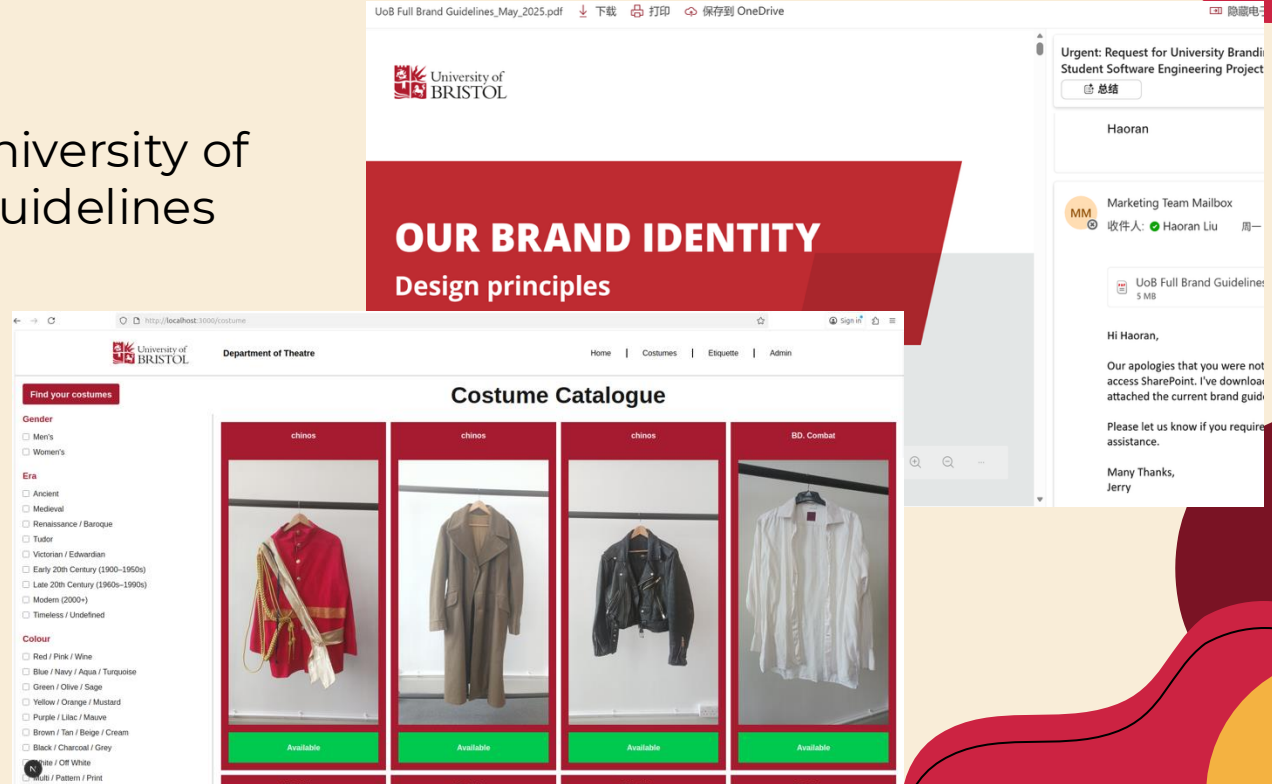

Demo

Interface Design

- Consistent with University of Bristol branding guidelines
- Accessible
- Efficient

Suggested change

```
- <div className="min-h-[3rem] max-h-[3rem] mb-4 line-clamp-2  
  overflow-ellipsis overflow-hidden">  
- {costume.name}  
+ <a  
+ href={` /costume/${costume.id}`}  
+ className="..."  
+ aria-label={`View details for ${costume.name}`}  
+ >  
+ {costume.name}  
+ </a>
```

Commit suggestion

Add suggestion to batch

Consider using an `<a>` tag, this improves accessibility (keyboard users can navigate, screen readers understand it's a link) and is more semantic for SEO.

However, if this change risks breaking the code, feel free to ignore it.

User Testing Plans

- First year drama students to use & fill in SUS questionnaire
 - Volunteer for structured interview
- Task-based evaluation (timed)

Costumes Website Feedback

Anonymous questionnaire for Wickham Theatre's Costume Stock Website using the System Usability Scale

1. Evaluation *

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
I think that I would like to use this website frequently	☐	☐	☐	☐	☐
I found the website unnecessarily complex	☐	☐	☐	☐	☐
I thought the website was easy to use	☐	☐	☐	☐	☐
I think that I would need the support of a technical person to be able to use this website	☐	☐	☐	☐	☐
I found the browsing, filtering and booking functions of the website were well integrated	☐	☐	☐	☐	☐
I thought there was too much inconsistency in the website	☐	☐	☐	☐	☐
I imagine that most people would learn to use this website very quickly	☐	☐	☐	☐	☐
I found the website very awkward to use	☐	☐	☐	☐	☐
I felt very confident using the website	☐	☐	☐	☐	☐
I needed to learn a lot of things before I could get going with this website	☐	☐	☐	☐	☐

Feedback

- Positive
 - Loved UI look & experience
 - Catalogue style
- Keen to develop new features

CI/CD

- Backend API unit testing e.g **`'/api/costume/[id]'`**
 - *(now implemented - missed MVP deadline)*
- Build Docker images on push
 - Deploy to AWS
 - Receive feedback from client iteratively and quickly

Project Management

- Work ethic: regular commits, organised Kanban board.
- Team environment: collaborative, nonjudgemental, constructive criticism.
- Team communication: 2 face-to-face meetings a week, active Teams chat.
- Client communication: in-person meetings.
- AI: tactical use to save time on simple information collation.

Challenge - app for
Android & iOS

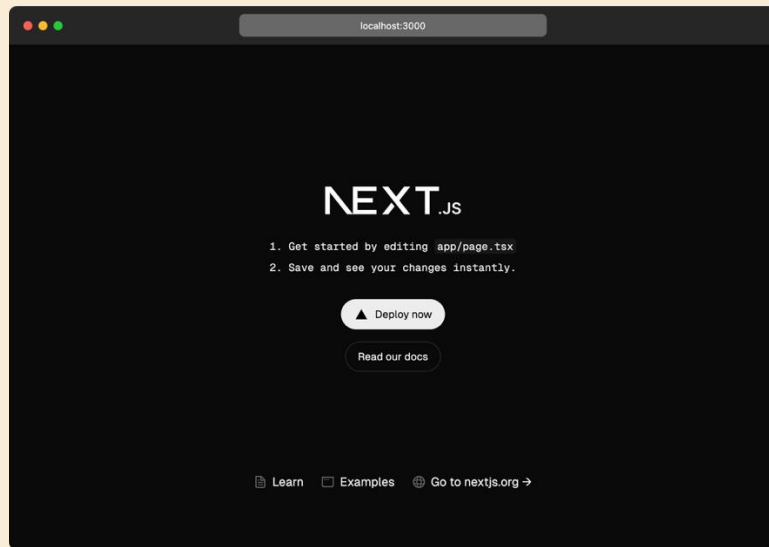

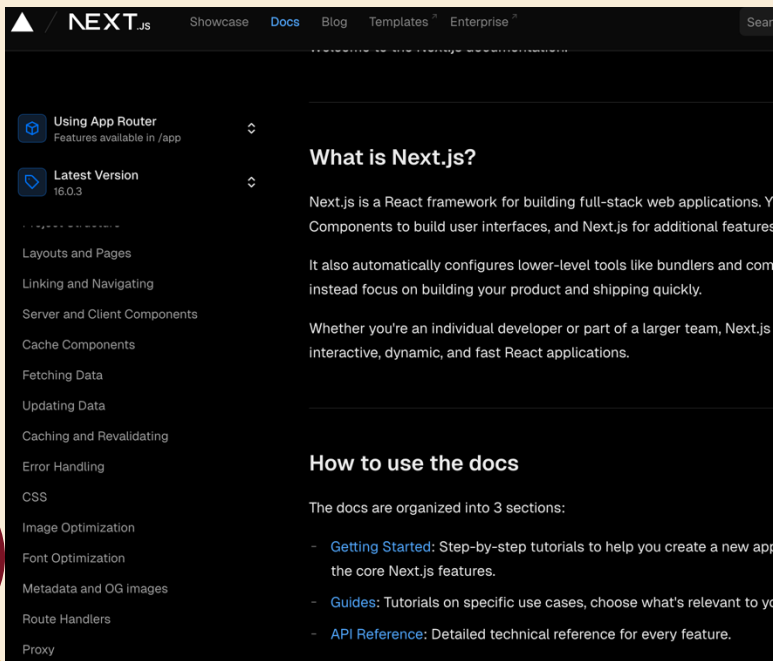

Solution - **webapp**

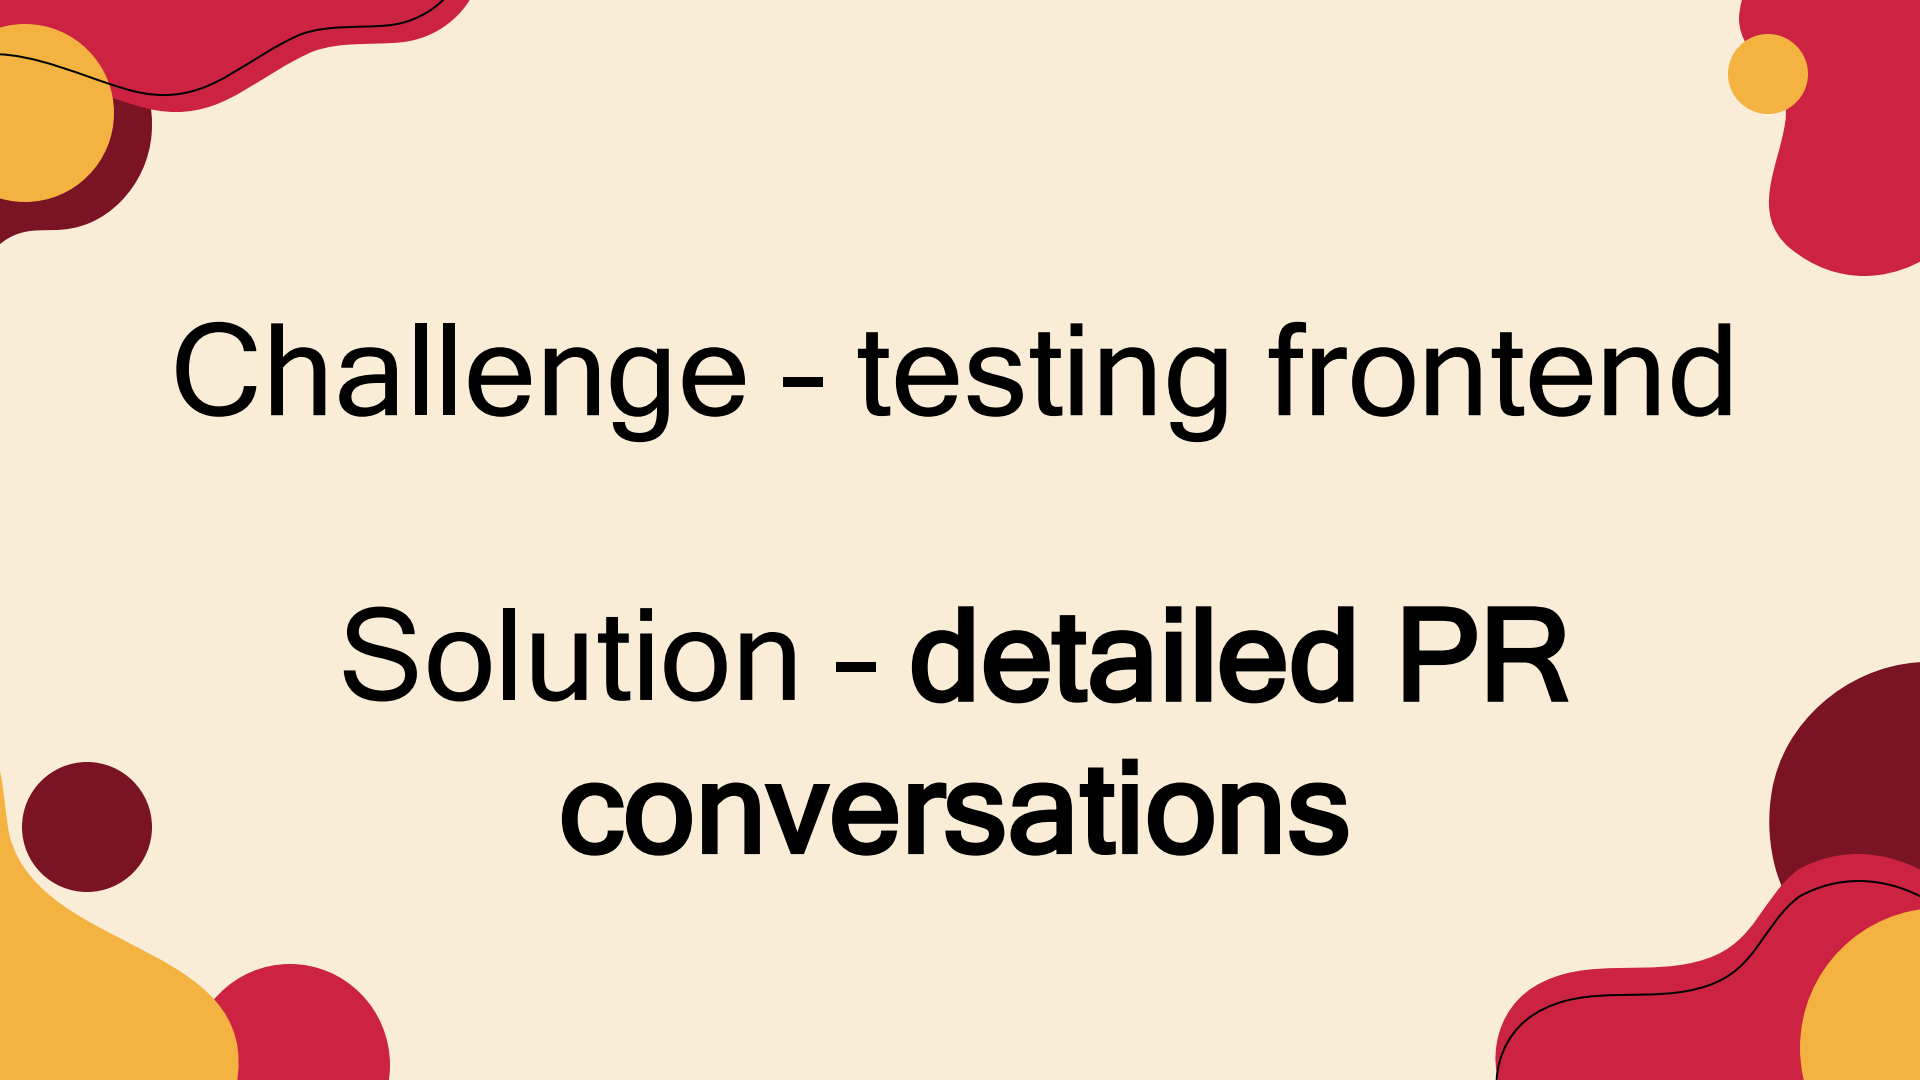

Challenge - inexperience

**Solution - teamwork &
hard work**

NEXT.JS WORKSHOP

Challenge - testing frontend

**Solution - detailed PR
conversations**

16 comments / PR* on average

*excluding documentation & fix PRs

costume-stock-app/src/components/pagination/Pagination.tsx Outdated Hide resolved

```
27 +   itemsPerPage = 16,  
28 + } : PaginationProps {  
29 +   const [currentPage, setCurrentPage] = useState(0);  
30 +   const [newItemsPerPage, setItemsPerPage] = useState(itemsPerPage);
```

tom-devv 3 weeks ago

Suggested change

- const [newItemsPerPage, setItemsPerPage] = useState(itemsPerPage);

+ const [itemsPerPage, setItemsPerPage] = useState(itemsPerPage);

Commit suggestion

Rather than calling it `newItemsPerPage` I think to stick with convention maybe drop the `new`, this is sort of implied when using `useState` anyway

HaoranLiu6 3 weeks ago

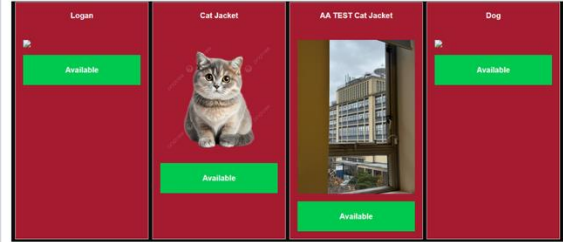

I suppose that call it "currentItemsPerPage" and "setCurrentItemsPerPage" would be more clear, but I understand these names are pretty long.

JakeSneeBris 3 weeks ago Author

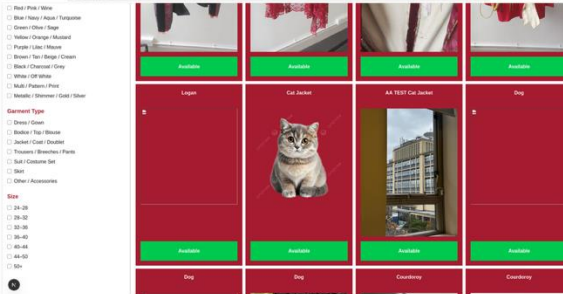

I have changed this to "currentItemsPerPage". I can't call it `itemsPerPage`, as it gets upset that both it and the Prop have a variable called "itemsPerPage".

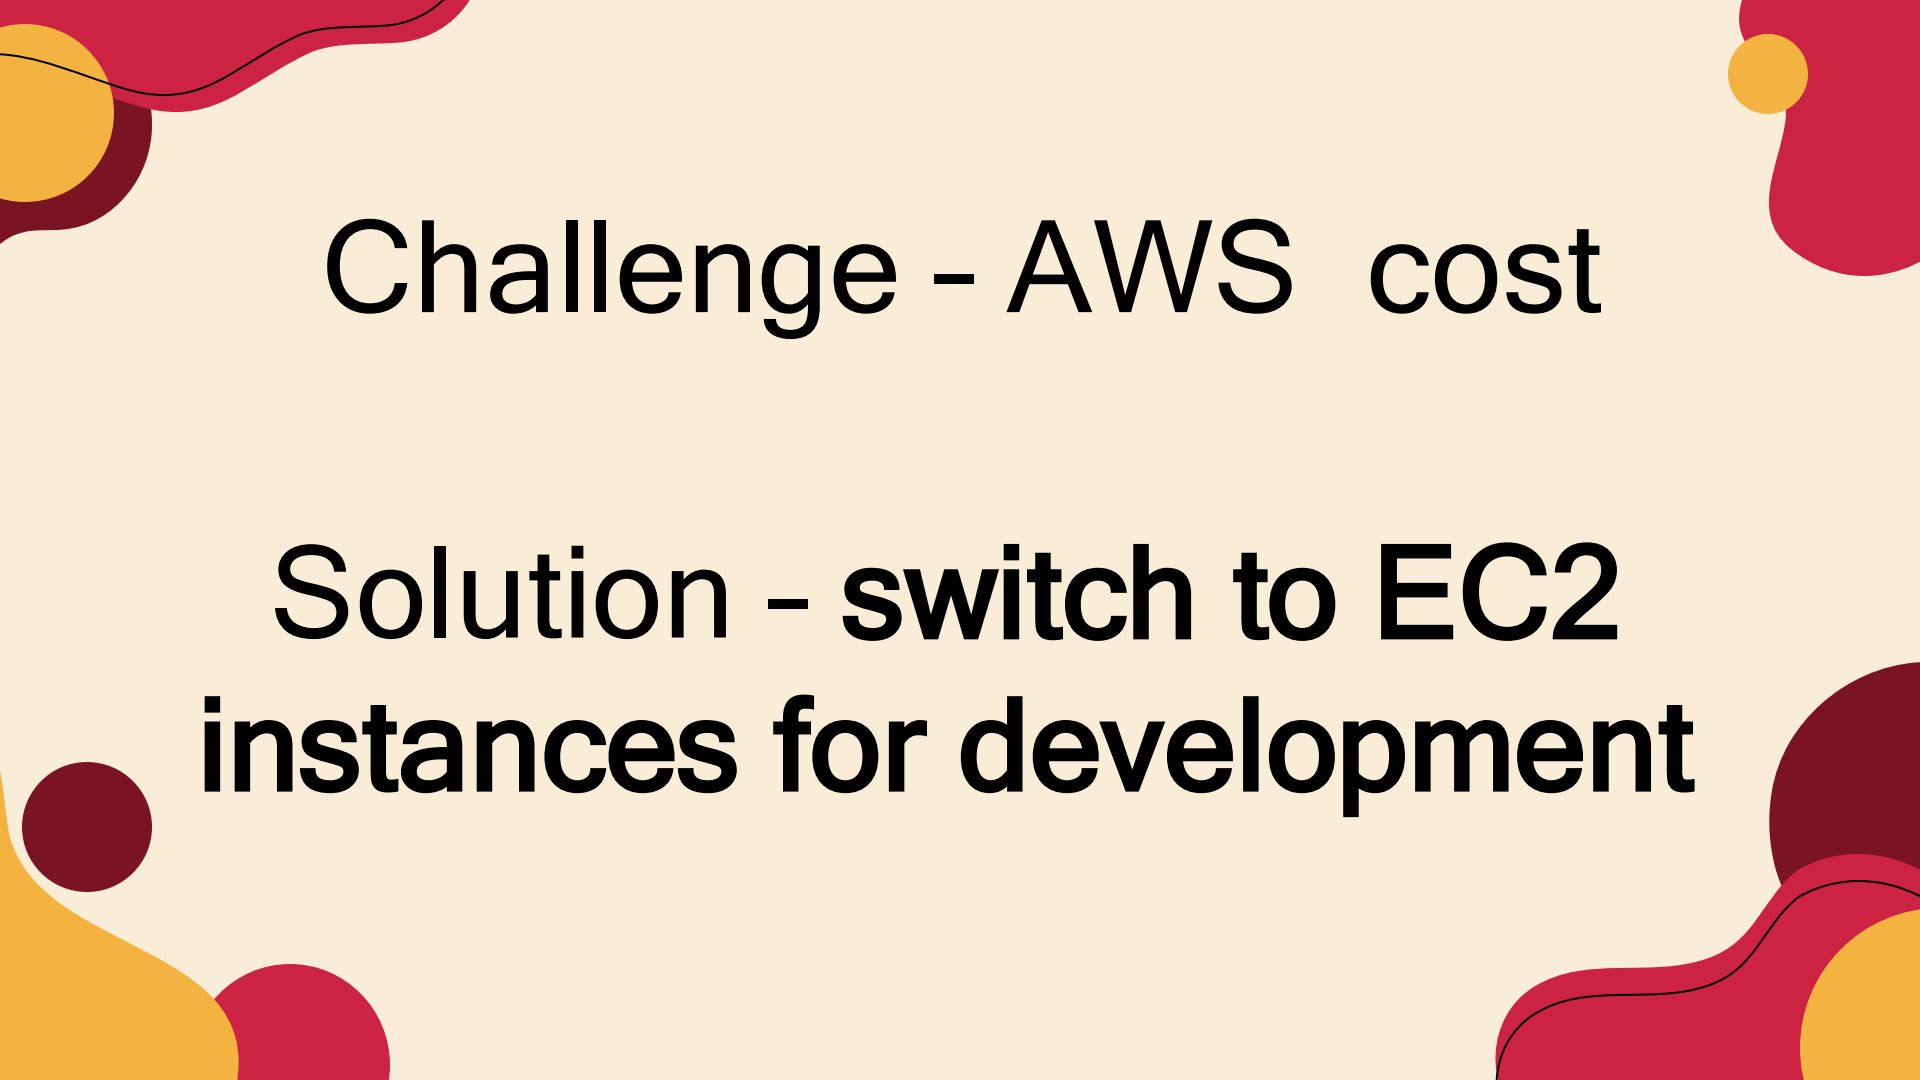

sophb7 commented 2 days ago • edited Author

When I look at the costume list, the availability button still moves depending on the size of the image.

Great catch, seems like my fix from earlier didn't merge properly. I've done it manually now

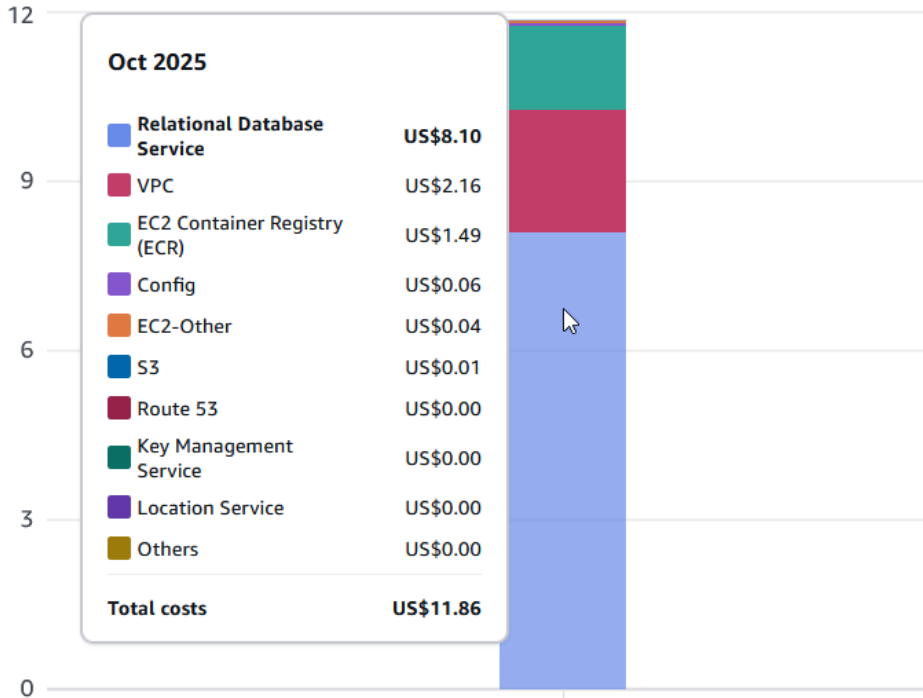

Challenge - AWS cost

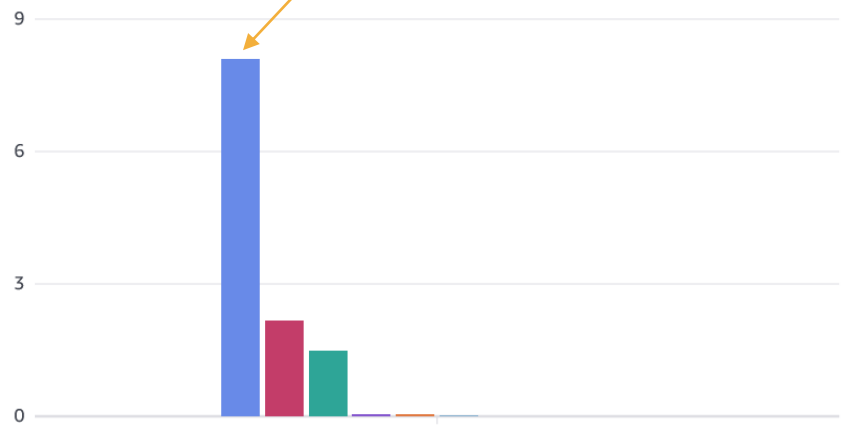

**Solution - switch to EC2
instances for development**

Cost and usage graph

Costs (\$) October – Usage Costs

RDS was driving up costs significantly

Easy to manage

[Open all](#)

Easy to set up and deploy

We can do this ourselves on EC2 with docker

Manage database administrative tasks

+

Monitor and view database metrics

+

Scale infrastructure with AWS CloudFormation

+

Turn on event notifications with subscriptions and Amazon Simple Notification Service (Amazon SNS)

+

Enhance security and compliance with configuration governance

+

Database cloning

+

Safer, simpler, faster upgrades with Amazon Relational Database Service (Amazon RDS) Blue/Green Deployments

+

Analyze Amazon RDS data using zero-ETL integrations

+

Not needed during development

Future Aims

Features

- Booking
- Mobile friendly
- Login
- AI aided searching
- AI aided uploading

Project Management

- Use more CI/CD
- Obtain user feedback

Thanks!
