

Meeting your Client ?

Some top-tips...

# Top Tips for first client meeting

- Get to know your main point of contact
- Make sure you have their contact details
- Find out what ***they think*** the business problem is
- Listen politely to what ***they think*** solution should be
- Try to identify the limits (“outer edge”) of solution
- Arrange a demo of any existing systems
- See if you can get a tour of their site or activities
- Give client a feel for the release schedule
- Make arrangements for the next meeting

# Initial Objective

- The aim is to start to understand project context
- Become familiar with client business
- Learn about domain within which they operate
- Identify key stakeholders
- Uncover their main concerns
- Become aware of the problems and challenges

Shortly we will provide guidance on actually eliciting and documenting some specific needs
